

* Print Row-wise Sum:-

Iterate over each row
& get it's sum.

TC: $O(N * M)$

SC: $O(1)$

* Print column-wise max Sum:-

1) go to column by column

& calculate sum.

2) Print max sum

TC: $O(N * M)$

SC: $O(1)$

* Print diagonal elements of $(N * N)$:

TC: $O(N)$

SC: $O(1)$

* Print Diagonal elements R-L $(N * N)$:

TC: $O(N * M)$

SC: $O(1)$

* Transpose in place:-

Row $\longleftrightarrow$ Column

TC: $O(N^2)$

SC: $O(1)$

* Rotate by 90° clockwise (N*N):-

1) Transpose you matrix

2) Reverse each row

TC: $O(N^2)$

SC: $O(1)$
